

STOVE SHOWDOWN

The stoves in this showdown are displayed in scale with each other. While not a comprehensive list, it is representative of several competing types.

For more on the Super Cat Alcohol Stove, visit www.SuperCatStove.com.

| | Super Cat | Pepsi Can | Pocket Rocket | GigaPower | WindPro |
|---------------|---|---|--|--|---|
| COST | \$.50 | \$1.50 | \$40 | \$40 | \$90 |
| WEIGHT | .25 ounces | .25 ounces | 3 ounces | 3 ounces | 7 ounces |
| FUEL | Denatured Alcohol, HEET | Denatured Alcohol, HEET | IsoPropane Canisters | IsoPropane Canisters | IsoPropane Canisters |
| PROS | Very light, easy to make, acts as pot stand | Vertical flames for smaller pots, very light | Powerful, built in wind-screen | Compact, adjustable flame, powerful, auto ignition model available | Remote nature allows for windscreen, stable, adjustable flame, powerful |
| CONS | Prone to wind and cold, flame not adjustable, limited fuel capacity | Requires pot stand, more difficult to construct, prone to wind and cold | Limited flame adjustability, taller than GigaPower, fewer pot stands | No built in wind-screen | Heavier and less compact than others in the showdown |

STOVE SELECTIONS

Ultra-light and Inexpensive: Super Cat Alcohol Stove

There are number of reasons to select this little gem as an ultra-light stove over competitors like the Pepsi Can stove. It's easy to make (a hole punch and cat food can is all that's needed) and doesn't require a pot stand (the pot is set directly on top of the stove).

Compact and Reliable: Giga Power

At 3 oz., shorter and with more pot supports than the Pocket Rocket, the Giga Power packs a punch. This is a great, reliable selection that runs off pressurized fuel when more reliability and control is required over an alcohol stove.

Groups and Gourmet: WindPro

The WindPro justifies carrying a few more ounces (7 total) and a bit more bulk. Its ability to easily change from a roaring flame for boiling water to a gentle simmer for pizzas and pancakes is only matched by its reliability, pot stability and the high efficiency of a possible windscreen.
